| Patient Jane Doe | Patient ID JD930304 | Non-smoker |
| DOB 3/4/1993 (24 yrs) | Report Date and Time 11/1/2017 12:00 | BMI 19.2 Waist 26 in |
| Gender F | Received Date and Time 10/26/2017 13:00 | Medications None indicated |
| | Specimen Collection Date and Time Blood Spot 10/17/201 9:20:00 | Provider ID: 0000 Doctor T 6655 SW Hampton St Tigard, OR 97223 Ph: xxx-xxx-xxxx |
| | Hours of Fasting 00:00 | |
| | Family History of | |
| | Heart Disease Yes | |
| | Diabetes No | |
| | Cancer Yes | |

YOUR TEST RESULTS

HbA1c (%)

What do your test results mean?

Hemoglobin A1c (HbA1c), is a form of hemoglobin (a blood pigment that carries oxygen) that is bound to glucose. Blood HbA1c levels are reflective of how well diabetes is controlled. The normal range for hemoglobin A1c is less than 5.7%. HbA1c levels are reflective of blood glucose levels over the past six to eight weeks and do not reflect daily ups and downs of blood glucose. High HbA1c levels indicate poorer control of diabetes than levels in the normal range.

This report is only for information purpose and does not provide any diagnosis or treatment. There may be many other risk factors that must be considered for a complete assessment of your health. Please consult your healthcare provider to discuss your results and any questions you may have about your wellness.
