 REPORTED:

Test Name	Result	Flag	Reference Range	Lab
-----------	--------	------	-----------------	-----

FASTING: UNKNOWN

HAEMOPHILUS INFLUENZA TYPE B ANTIBODY (IGG)

HAEMOPHILUS INFLUENZA TYPE B	<0.15	LOW	mcg/mL	04
------------------------------	-------	-----	--------	----

REFERENCE RANGE:

> or = 1.00 mcg/mL

INTERPRETIVE CRITERIA:

<0.15 mcg/mL Nonprotective Antibody Level

0.15 - 0.99 mcg/mL Indeterminate for protective antibody

> or = 1.00 mcg/mL Protective Antibody Level

IgG antibody to polyribosylribitol phosphate (PRP), the capsular polysaccharide of Haemophilus influenzae type b, is measured in micrograms/mL (mcg/mL), based on correlations with a reference Farr radioimmunoassay (RIA). The exact level of antibody needed for protection from infection has not been clarified; values ranging from 0.15 mcg/mL to 1.00 mcg/mL have been reported. A four-fold increase in the PRP IgG antibody level between pre-vaccination and post-vaccination sera is considered evidence of effective immunization.

Performing Laboratory Information:

01: Quest Diagnostics-West Hills, 8401 Fallbrook Ave, West Hills CA, phone:

Medical Director: MD Enrique Terrazas

02: Quest Diagnostics/Nichols SJC-San Juan Capistrano,, 33608 Ortega Hwy, San Juan Capistrano CA, phone:

Medical Director: MD, PhD Jon Nakamoto

03: Quest Diagnostics-Nichols Valencia, 27027 Tourney Rd, Valencia CA, phone:

Medical Director: MD, FCAP Basel Kashlan

04: Focus Diagnostics-Focus Diagnostics, 33608 Ortega Highway, Building B-west Wing, San Juan Capistrano CA, phone:

Medical Director: MD Hollis J Batterman
